

Transform Method - 1500 Calorie Meal Plan

Daily Macros: 112g Protein | 50g Fat | 150g Carbs

Distribution: 30% Protein | 30% Fat | 40% Carbs

How to Adjust This Plan to Your Preferences

This plan uses a balanced macro distribution that works for most people. However, you can adjust based on your preferences:

If you prefer MORE CARBS and LESS FAT:

- Increase carbs by 20-30g
- Decrease fat by 10-15g
- Example: Swap nuts for fruit, use less oil, choose leaner proteins

If you prefer MORE FAT and LESS CARBS:

- Increase fat by 10-15g
- Decrease carbs by 20-30g
- Example: Add avocado, nuts, olive oil; reduce rice/bread portions

Keep protein consistent - it's essential for maintaining muscle during fat loss.

Adjustment Guidelines

Prefer Lower Carb / Higher Fat?

- Reduce rice/bread portions by $\frac{1}{3}$
- Add 1 tbsp olive oil, nuts, or avocado to meals
- New split: ~25% carbs, 35% fat, 40% protein

Prefer Higher Carb / Lower Fat?

- Increase rice/bread portions by $\frac{1}{3}$
- Use cooking spray instead of oil
- Choose leaner proteins (chicken breast, white fish)
- New split: ~50% carbs, 20% fat, 30% protein

The key: Keep total calories around 1,500 and protein above 100g for best results.

Tips for Success

Hydration: Drink 8-10 glasses of water daily. Proper hydration supports fat loss and reduces false hunger signals.

Meal Prep: Cook proteins and grains in bulk on Sunday. Store in containers for easy grab-and-go meals throughout the week.

Flexibility: These meals are templates. Swap similar foods freely - chicken for turkey, broccoli for green beans, brown rice for quinoa.

Timing: Eat every 3-4 hours to maintain stable energy and prevent extreme hunger that leads to poor food choices.

Quality Matters: Choose whole, minimally processed foods 80% of the time. Your body responds better to real nutrition.

Important Notes

This meal plan is a starting point based on balanced macros that work for most people. Individual needs vary based on activity level, metabolism, body composition, and specific goals.

Use the Transform Method calculator at **transform-method.vercel.app/calculators** to determine your personalized calorie and macro targets.

Track your progress weekly. If you're not seeing results after 2-3 weeks, adjust calories by 10% or reassess your activity level and adherence.
